1 Introduction

Hello! My name is Chowdhury Amir Abdullah and this is my first L^AT_EX document.

If you leave a line gap in between two lines, it will create a hard return/enter. (Start a new paragraph). Like this paragraph here.

However, if you want to have a soft return, then at the end of your line, you type two backslashes.

A rectangle has side lengths of $(x + 1)$ and $(x + 3)$.

The equation $A(x) = l.b$ gives us the area of the rectangle. Because we have used a single dollar sign before and after the equation, the equation will be displayed within the paragraph.

The equation

$$A(x) = x^2 + 4x + 3$$

however, gives the area of a conic section. Because we have used two dollar sign before and after the equation, the equation will be given a separate line.
